Statycal Data Modernization One-Pager

Overview

Statycal helps enterprises modernize their data estates, fortify identity & cloud security, and launch automation copilots. By aligning data strategy with business goals and leveraging modern cloud platforms, Statycal delivers enterprise outcomes—without the drag of legacy systems.

The Challenge

- **Fragmented legacy systems** make it hard to integrate multiple data sources and applications.
- **Poor data quality and governance** lead to lost opportunities, inconsistent reporting and high remediation costs ([The data estate and data modernization in Dynamics 365](#)).
- **Slow insights** from outdated analytics and manual processes hamper decision-making.

Our Solution

- **Modern Data Estate**: Design and migrate your data estate onto scalable cloud platforms (Azure, AWS, Power Platform, M365), breaking down silos and enabling real time analytics.
- **AI & Automation**: Use advanced analytics, machine learning and automation to drive down costs and accelerate time to insight. Modern data estates empower employees to access information quickly and make better decisions ([The data estate and data modernization in Dynamics 365](#)).
- **Governance & Compliance**: Align with OSFI, PCI DSS and SOC2 requirements, ensuring secure identity management and data protection.
- **Outcome-Focused Playbooks**: Tested methodologies derived from regulated industries ensure predictable, measurable results.

Measurable Benefits

Benefit	Detail	Evidence/Insights
Reduced Cost to Serve	Automation and cloud FinOps reduce operational overhead, delivering cost savings	Modernizing data estates and integrating AI/automation improves efficiency and lowers costs ([The data estate and data modernization in Dynamics 365](#))

Faster Decision-Making	A unified BI layer with governed metrics reduces time-to-decision and enables real-time analytics	When data is unified and accessible, employees can make faster, smarter decisions ([The data estate and data modernization in Dynamics 365](#))
Security Hardening	IAM & PAM uplift aligned to CIS controls; enhanced identity and cloud security ensure compliance	Modern data estates improve governance and security, transforming legacy systems into unified, secure platforms ([The data estate and data modernization in Dynamics 365](#))

Engagement Models

- Project / Retainer / Time & Materials
- Compliance depth: OSFI, PCI DSS, SOC2 ready
- Cloud expertise: Azure, AWS, Power Platform, M365

Why Choose Statycal

- **Proven Playbooks** tested in regulated environments for reliability.
- **Outcome Dashboard** with transparent metrics such as cost savings, decision-making speed and security posture.
- **Trusted Partners** across Azure, Power BI, CyberArk, Databricks and other leading technologies.
